

SURGICAL OPERATION MEDICAL DISPLAY

MS430PC 42.5"

The 42.5-inch 4K surgical medical display adopts a 3840X2160 ultra-high-definition screen with 4 layers of AR-coated ultra-white tempered glass on the front, which is effective anti-fouling and anti-fog. With a complete signal interface, it is suitable for a variety of image display. The appearance adopts a full-mirror design, which effectively prevents dust and liquid pollution during the operation, and meets the high-level purification requirements of the operating room. The standard installation structure is fully compatible with operating room installation.
